Hearing Testing and Diagnosis

Hearing test is a procedure followed in order to evaluate the sensitivity of a person sense of hearing. The hearing in noise test measures a person ability to hear speech in quiet and in noise.

Speech & Language Therapy for Children

Speech & language therapy is the treatment of communication disorders. It refers to rehabilitation, teaching, counseling or behavior modification. Every therapy is different accordingly the goals are different for various disorders as the needs and symptoms are different with each case.

Stammering Therapy (Fluency Therapy)

Fluency disorder, commonly known as “stuttering” can be defined by primary and secondary behaviors. Primary behavior includes repetitions of sounds, whole words, and syllables, prolongations of single sounds, blockages of airflow or other speech-related issues.

Product

A hearing aid is an electronic device that consists of a microphone, an amplifier, a loudspeaker and a battery. Modern hearing aids are very small and discreet and can often be worn inside your ear.

Testimonials

01

Mr.Leela Dhar Prasad Sinha(Age-82Yrs-Male) - Noida
Problem : Bilateral Severe Sensorineural Hearing loss

My father in law is having vision problem suffering from many old age diseases and bed ridden in addition to sudden hearing loss from both ear got tensed and he lost hope for life to live but due to Dr. Barkha, he got a new sense of hearing. Digital Hearing Aid fitting changed my father in law life and now we are able to communicate with him. Initially we are facing lot of difficulties due to this entire problem then suddenly loss of hearing created lot of difficulties, now with help of Hearing aids my father in law and our families able to communicate well .We all are very grateful to Dr. Barkha.

02

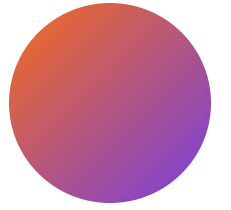

Mr.Ayush(Age-22Yrs-Male)-Noida
Problem : Tele-rehabilitation

I am a 22 year old student who had mild stammering since early childhood. Visited Barkha maam for the same issue. As during this phase of lockdown, physical sessions were not possible so i tried out the digital platform for speech therapy conducted by maam. I have had just 10 sessions till date and saw tremendous improvement in my speech. All thanks to maam for boosting self confidence and for providing great ways to overcome the problem. I highly recommend her to anyone who is facing similar issue!
