

# Free COVID-19 Testing Clinic

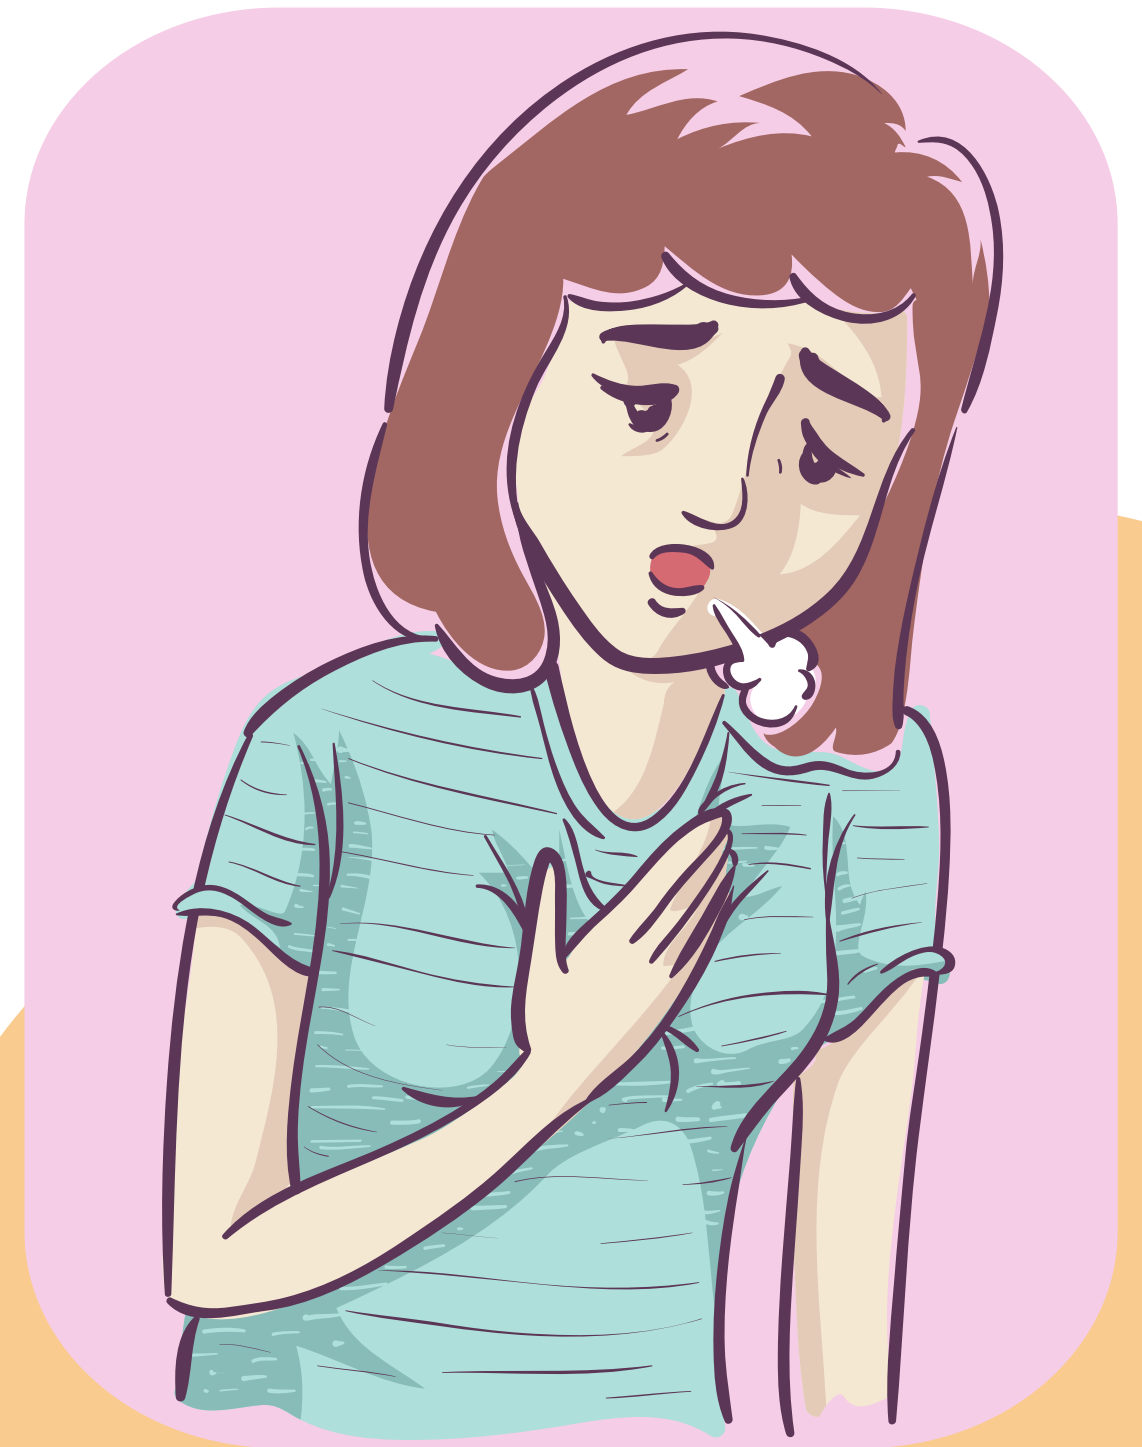

COVID-19 testing is free and confidential for all citizens. However, even though it is free, it is not necessary for people to have the virus before being vaccinated. Get inoculated to avoid the need for testing.

# COVID-19 should be checked by anyone who has symptoms or has been exposed to it:

- Anyone who exhibits symptoms of COVID-19 should get tested as soon as possible.
- Those who have not been vaccinated but have been in close proximity to someone who has tested positive for COVID-19 should be tested.

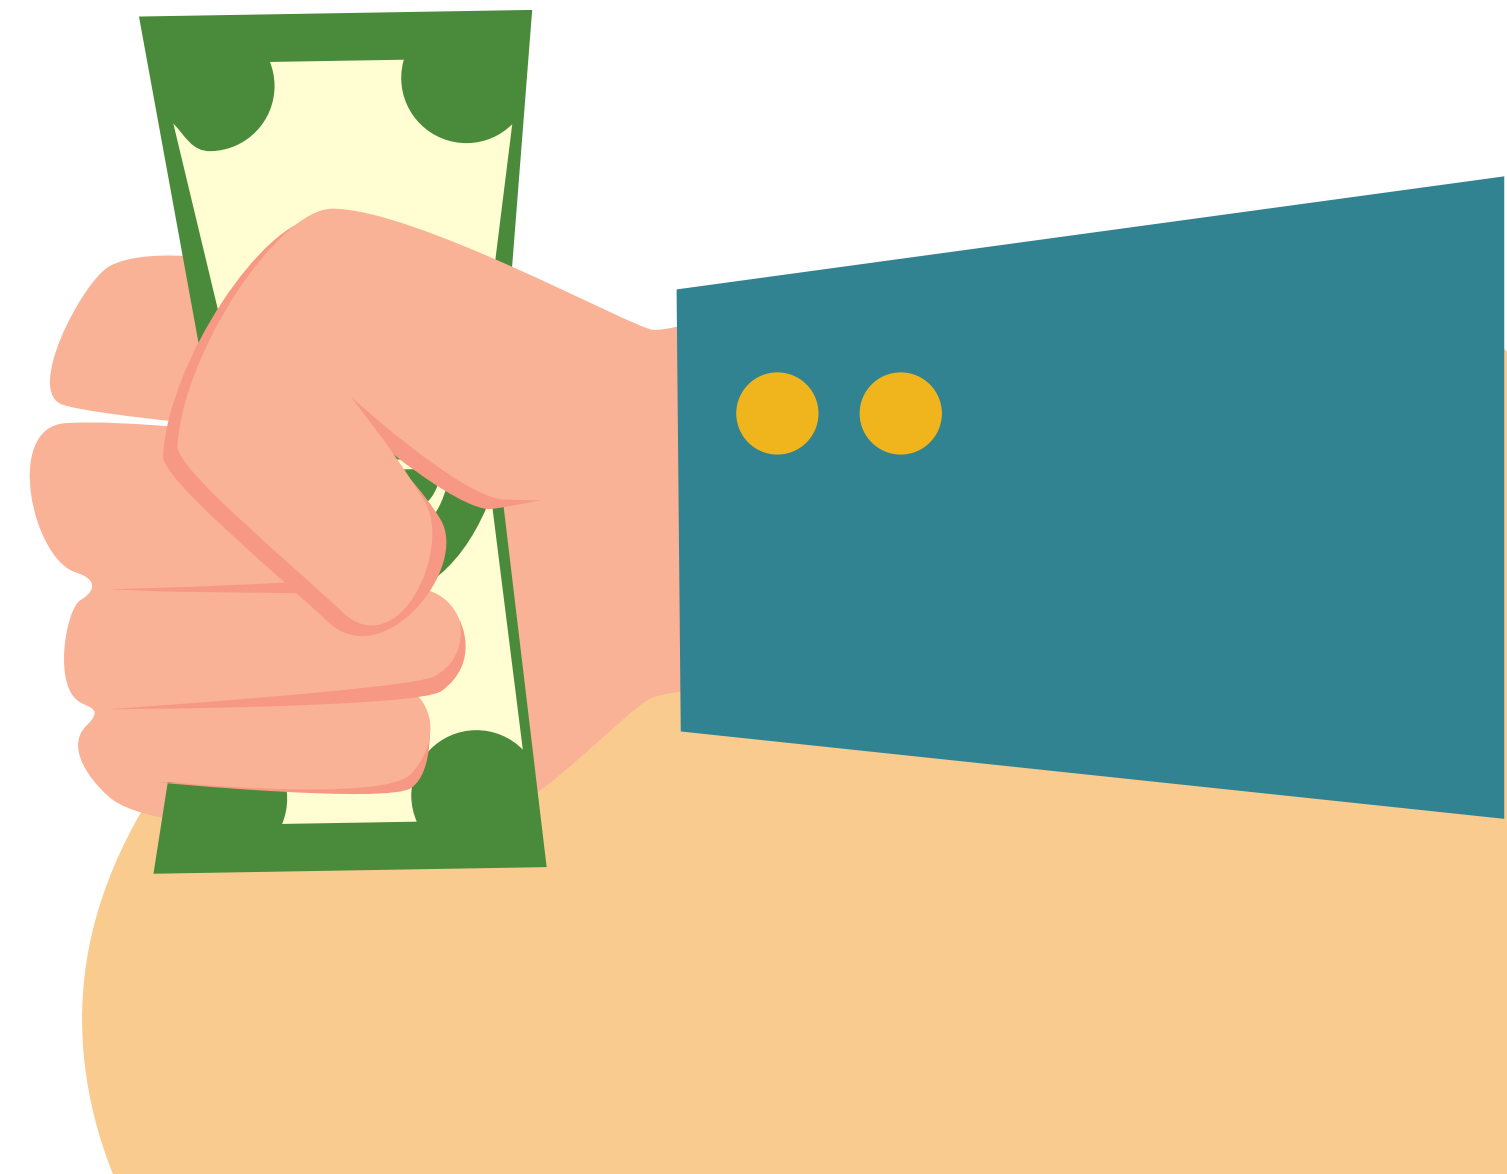

**If they will be involved in activities that put them or others at risk for COVID-19 exposure, non-vaccinated individuals should be tested. Prior to entry, admittance, competition, or travel, testing should be completed. Pre-testing should be considered for the following:**

- Attendance in large indoor social or mass gatherings.
- Large groups of individuals in close quarters
- Competitions in sports
- Attractions such as amusement parks
- Participating in high-risk sports -Attending other events in crowded or inadequately ventilated environments

There are no out-of-pocket costs for COVID-19 testing at any government-supported testing site. A COVID-19 test can be given to a health plan enrollee at no cost by any practitioner, whether in or out of their health plan's network. The government will cover the cost of your test if you don't have health insurance. Please visit the Covid Clinic website for further information about your location.

**Testing is available at the Covid Clinic for people of all ages. There are no restrictions on age, including for infants.**

-For testing, you must make an appointment. We accept walk-ins, however, we encourage that you schedule an appointment ahead of time.  
-At any moment, you have the opportunity to amend or cancel your appointment. This service is provided by Covid Clinic.
