DR. ALEX SHALMAN
aesthetic dentistry

NEW YORK CITY DENTIST

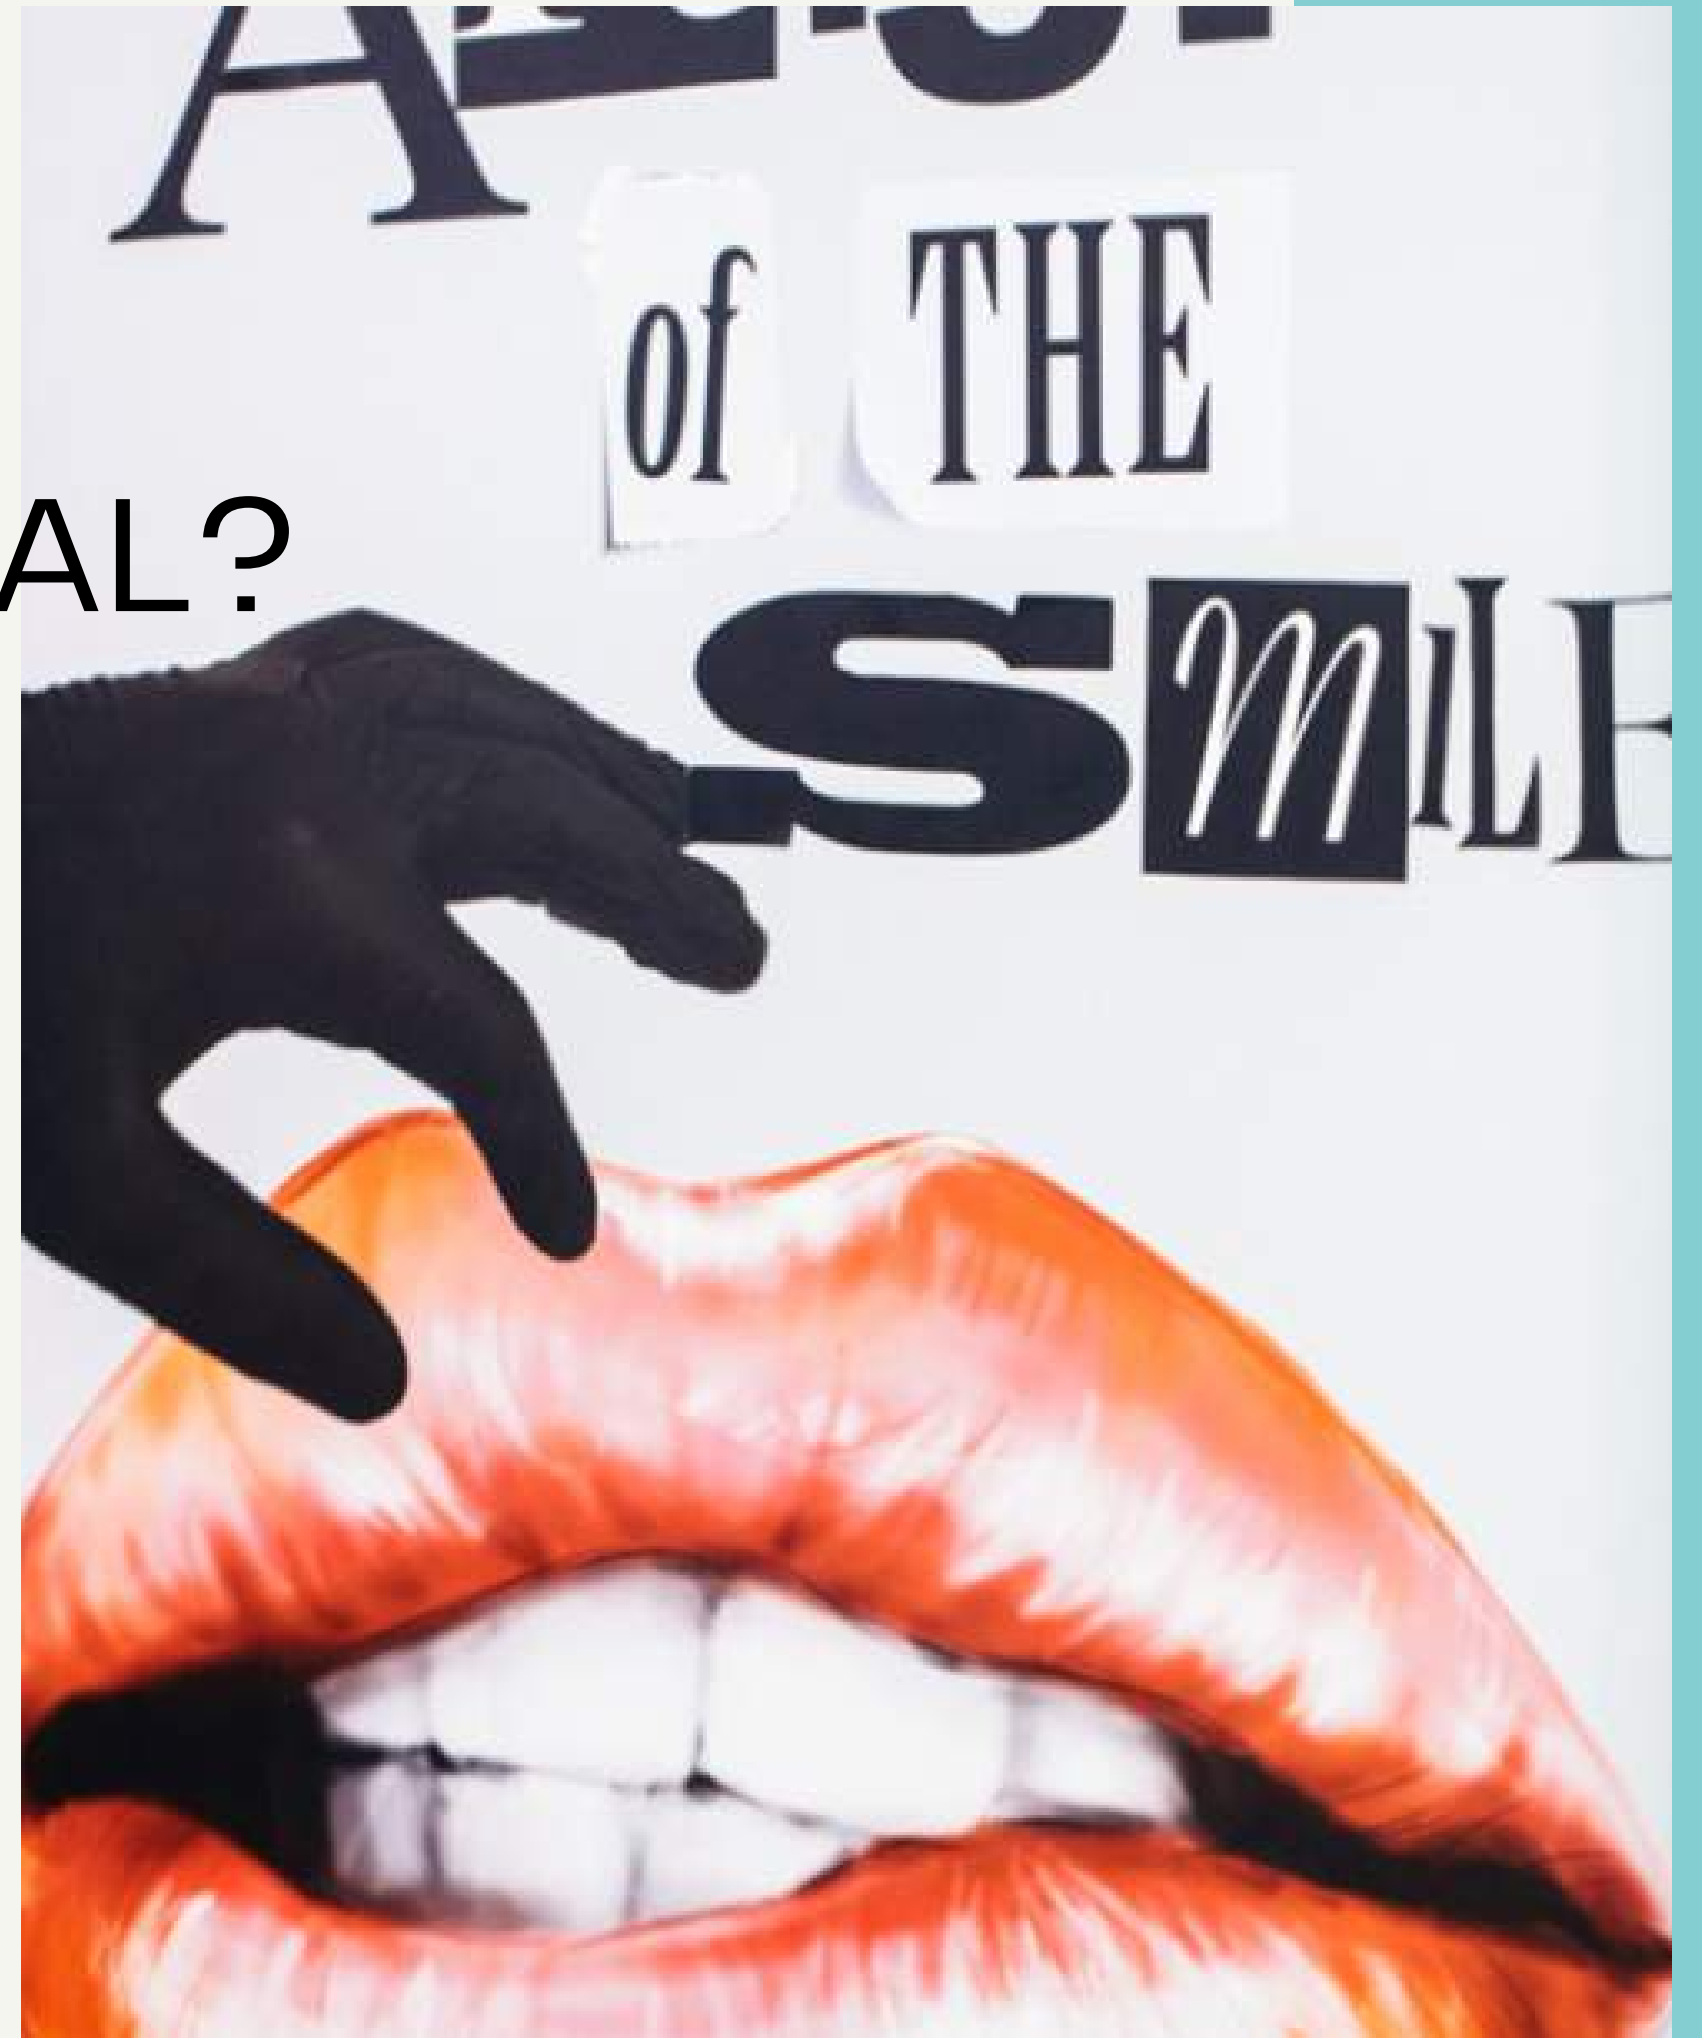

100 YEARS OF DENTISTRY

My name is Dr. Alex Shalman, and I am a cosmetic dentist in New York City and New Jersey. I am also a fifth generation dentist. Since my great, great grandmother finished dental school in 1917 to become one of the first female dentists in Moscow, Russia, my family has been practicing dentistry for nearly 100 years. I am the first male dentist.

WHAT MAKES OUR DENTAL OFFICE SPECIAL?

ARTIST OF THE SMILE

It takes a wizard — or in Dr. Shalman's case, an "Artist of the Smile" — to be able to keep your mouth as healthy and as attractive as possible, all at the same time. He understands that the best smiles are also the healthiest smiles, and that's what he works to deliver to you and your family.

NO INSURANCE?

\$195 CLEANING, EXAM & X-RAY

New patients' special invitation. No insurance? No problem. \$195 includes healthy mouth cleaning, X-Rays & Comprehensive Dental Exam.

New patients only. Cannot be combined with insurance or other offers. Cleaning does not include periodontal gum therapy. Limit one per patient.

DENTAL SERVICES NYC

COSMETIC DENTISTRY

As a cosmetic and family dentist, Dr. Alex focuses on improving both the health and appearance of your teeth and gums. He knows that a beautiful smile isn't possible without a healthy base.

ORTHODONTICS

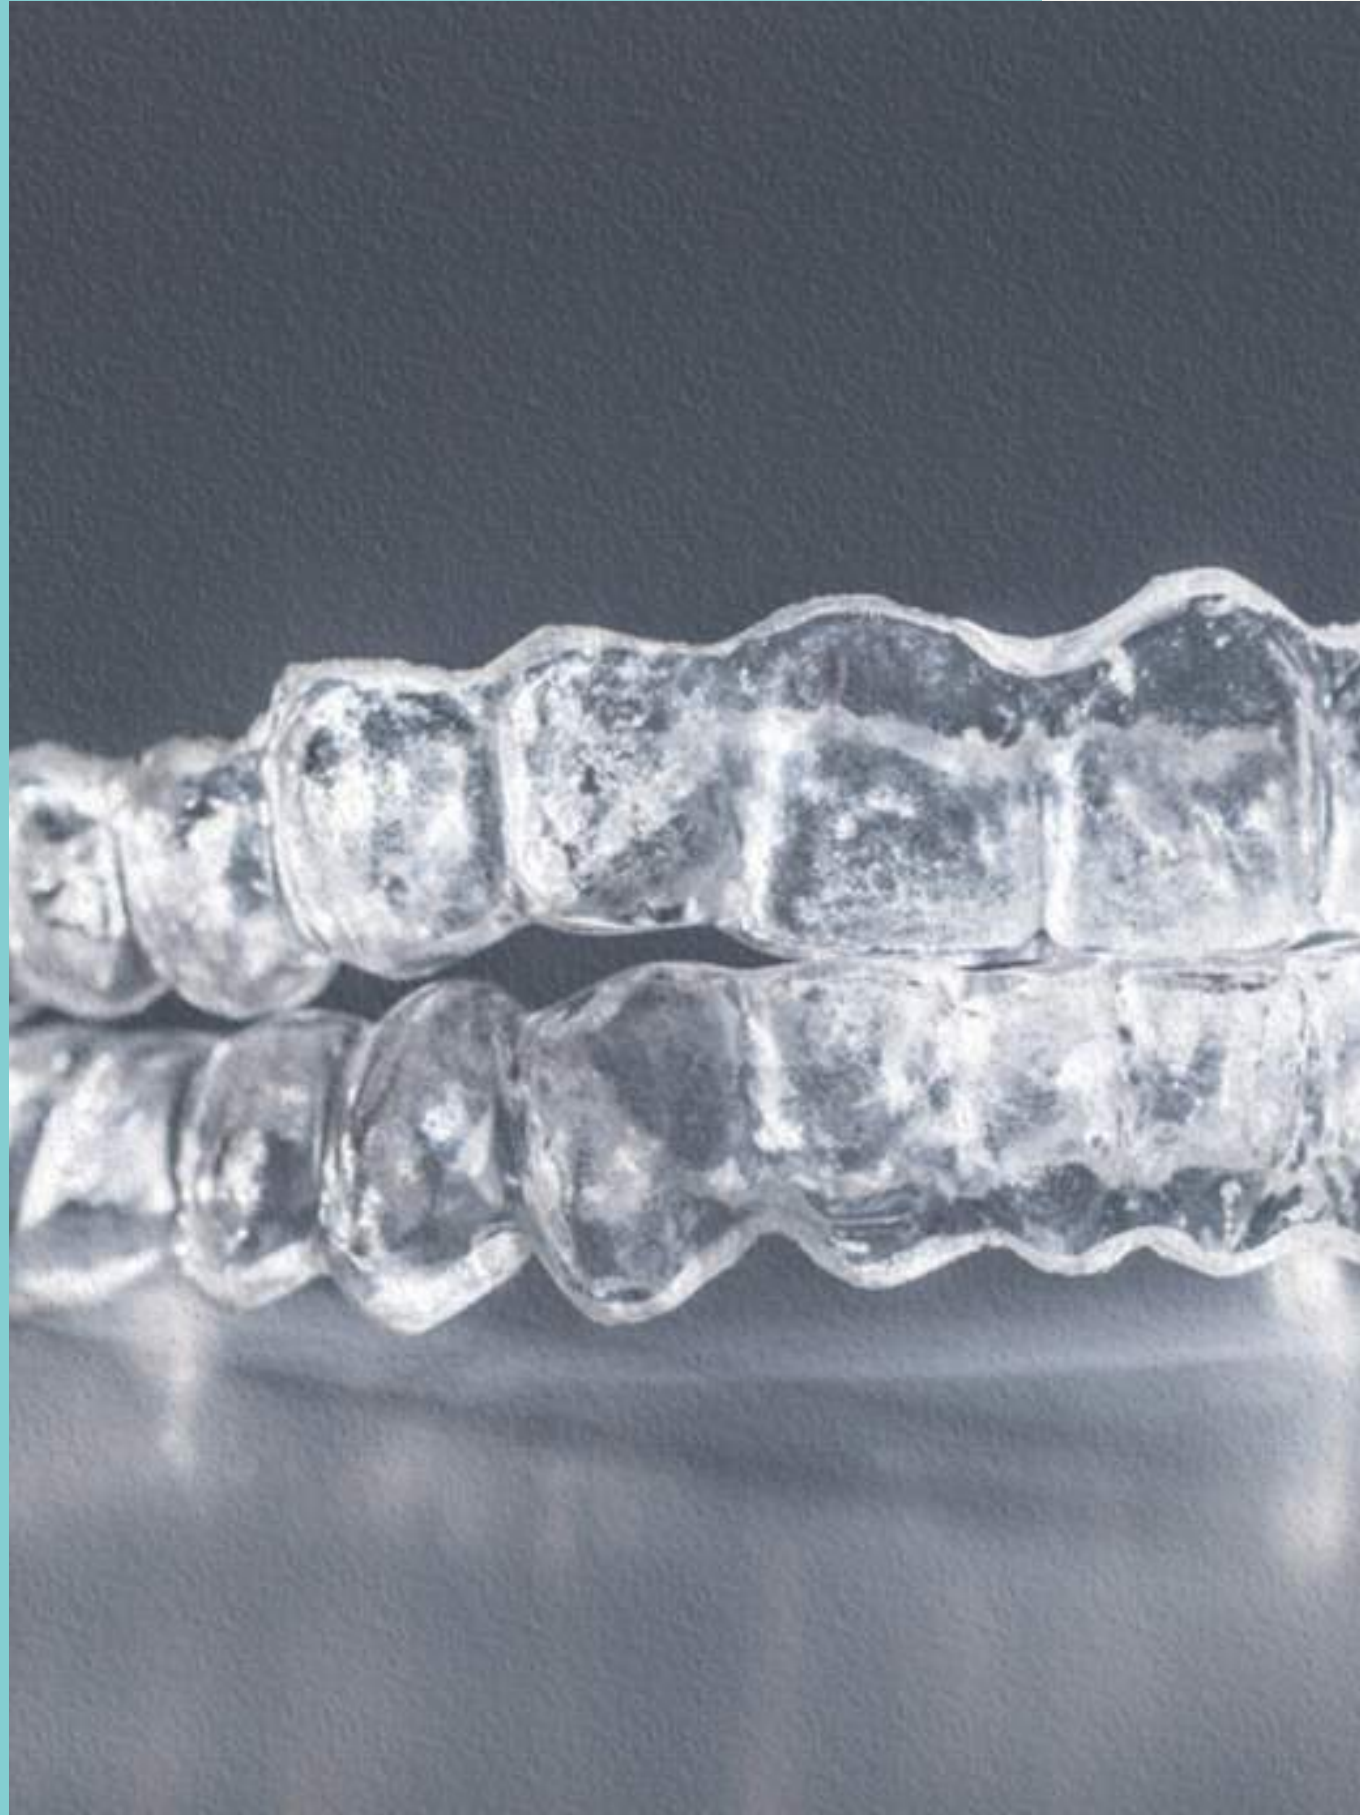

Decision of choosing your orthodontic care can be overwhelming. Dr. Alex makes it easy by providing you with exceptionally personalized care treatment and straighten your teeth discretely.

FAMILY DENTISTRY

Family dentist, Dr. Alex, your trust-worthy partner, helping you keep your mouth and gums healthy and strong. He gives you sufficient time and attention to details to achieve best results.

FULL MOUTH RECONSTRUCTION

Dental implants are a specialty of Dr. Alex. At his modern, state-of-the-art boutique family and cosmetic dental clinic, he provides personalized treatment and care based on your specific needs.

INVISALIGN

Everyone wants straight teeth and a healthy bite, but many adults cringe at the thought of wearing traditional metal braces. Invisalign effectively straightens teeth and positively alters alignment in the comfort of virtually invisible plastic trays.

DENTAL IMPLANTS

Dental implants are titanium replacements for the roots of teeth, used to hold a replacement tooth or bridge in the event of tooth loss. Implants are not only important for aesthetics, but also help the jaw retain its form and density.
